

SUMMARY

Azure AI Engineer and Team Lead with 15+ years of experience building enterprise-scale platforms on Azure. Specialized in RAG architectures, agentic workflows, and LLM-powered systems, delivering production-grade copilots and document intelligence pipelines. Proven track record of leading cross-functional teams and owning end-to-end delivery of scalable, low-latency AI systems used by thousands of users.

EMPLOYMENT

Team Lead / Azure AI Engineer Applied Materials and Microsoft	Tech Mahindra (Zen3)	Dec 2018 – Present
---	-----------------------------	---------------------------

AI Platforms, Copilots, and RAG Systems

- Led design and delivery of **enterprise AI platforms and copilots** using Azure OpenAI, Azure AI Search, and agentic frameworks for 2K+ active users.
- Built **RAG-based architectures** with hybrid search, chunking strategies, and re-ranking pipelines, improving response accuracy and system performance.
- Designed and implemented **multi-agent document intelligence system** processing 70K+ documents/month (OCR, classification, translation, extraction, validation).
- Developed **agentic workflows** orchestrating multi-step LLM pipelines, significantly reducing manual processing effort and turnaround time.

Full-Stack & Cloud Engineering

- Built scalable **React + .NET applications, Teams extensions, and copilots**, increasing user adoption from 30 to 5000+.
- Architected **low-latency APIs with Redis caching and optimized data models**.
- Owned **Azure cloud infrastructure** (App Services, Functions, Key Vault, Redis, Blob Storage) and CI/CD pipelines.
- Designed real-time dashboards integrating multiple enterprise data sources for analytics and feedback loops.

Leadership & Delivery

- Led teams (8–20 engineers), driving **architecture, design reviews, and delivery**.
- Owned end-to-end delivery: **system design, development, deployment, and production support**.
- Collaborated with stakeholders and product teams to align technical solutions with business outcomes.

Software Engineer Intern	Icertis	Summer 2017
---------------------------------	----------------	--------------------

- Designed and built chatbots for seamless integration with REST services accessible via email, Teams, and SMS, improving internal workflow automation.

Senior Software EngineerArchitecture and Exception Handling

CitiusTech

Aug 2015 – July 2016

- Led architecture and exception handling improvements, reducing exception rates by ~98%.
- Improved code quality through best practices and structured error handling frameworks.

Software Engineer L2Developed web applications for government digitization initiatives, improving claims and benefits processing.

Rolta India

Nov 2014 – Jul 2015

Software EngineerDelivered high-impact applications, including those for calculating sales bonuses and monitoring employee certifications, contributing to streamlined operations and increased efficiency within client organizations.

Paramatrix Technologies

Aug 2012 – Nov 2014

PROJECTS

Agent Assist – Document Intelligence Platform (2025–Present)

- Designed multi-agent AI system using Azure AI Foundry and Document Intelligence.
- Automated OCR, multilingual processing, classification, extraction, and summarization pipelines.
- Scaled system for high-volume enterprise workloads with optimized latency and cost.

Crystal RAG + Copilot Platform (2024–Present)

- Built enterprise RAG platform with Azure AI Search + OpenAI.
- Delivered copilots across Teams, CRM, and Office apps.
- Improved performance via caching, API optimization, and retrieval tuning.

Unified Action Tracker (Microsoft)

- Led greenfield rebuild of large-scale React/.NET multi-tenant platform replacing ADO workflows.
- Migrated 10K+ records with zero data loss; supported global users with high reliability.

EDUCATION

Software Engineering (M.S.)Computer Engineering (B.E.)

San Jose State University, CAUniversity Of Mumbai, India

August 2016 – May 2018August 2007 – May 2011

LANGUAGES AND TECHNOLOGIES

Programming: C#, Python, JavaScript (ES6), TypeScript, SQL
Frontend: React, Redux, Angular, D3.js, MVC, HTML5,
AI/ML: Azure OpenAI, RAG Architectures, LLM Pipelines, Prompt Engineering
Cloud & DevOps: Azure (App Services, Functions, AI Search, Redis, Key Vault), Docker, CI/CD
Frameworks/Tools: .NET Core, ASP.NET MVC, Node.js, CosmosDB, MongoDB, Redis, Postman
